## Slip agent + Anti Block

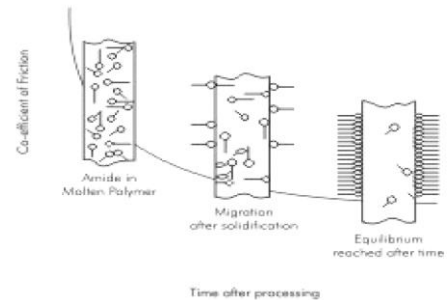

### 1. Identification of the Preparation

Product Type: Slip agent + Anti Block  
 Product Name: Slip  
 Appearance: Granule  
 Company: 3P

### 2. Product Description

As slip agent, fatty acid amides are normally used. During processing they are solubilized in the amorphous melt, but as the polymer cools and crystallizes the fatty acid amides are squeezed out forming a lubricating layer at the polymer surface. The addition of slip agents can prevent film sticking and pulling helping to increase throughput.

Property	Units	Value
Carrier Resin		LDPE
Carrier Resin MFI	gr/10 min	2
Density	gr/cm <sup>3</sup>	0.98
Oleamide	%	12
AntiStatic	%	1

### 3. Packaging

Slip bags should be stored in a dry and cool place below 35°C, protected from sunlight & tightly closed to avoid contamination .  
 Slip is packed in special 20kg bags.
